

Company Overview

Navigators in a Sea of Data

Information International Associates (Ila) is a woman-owned small business (WOSB) with 27 years of experience. Headquartered in Oak Ridge, TN, Ila has 10 national and international locations and approximately 220 employees who serve our customers worldwide. Founded in 1988, Ila has supported government agencies, academia, private entities, and international organizations. Our reputation for customer satisfaction is reflected in our top performance evaluation ratings and our ISO 9001:2008 and ISO/IEC 2000 certifications.

Services

Information Technology

Working in classified and unclassified environments to provide system administration, network operations, software and application development, social media/mobile technologies, information security, storage, service desk and desktop support, and data center operations

Knowledge Management

Working across the information life cycle to provide information and knowledge capture, description, organization, and dissemination services, quality assurance, work flow design, and integration with content management and portal technologies.

Data Exploitation

Leveraging a global network of subject matter experts to provide all-source intelligence analysis, open source research, training, database development, policy and strategy development, in-country research, language services, and comprehensive studies and assessments.

Statements from Our Clients

Department of Energy Office of Scientific and Technical Information

"[Ila] has consistently delivered exceptionally high quality services and product development which exceed contract requirements..."

Environmental Protection Agency

"Your team asked numerous hard questions up front, and figured out the answers needed to overcome various implementation challenges. The result was a product that works well and is delivered seamlessly. We could not have done it without you!"

NASA Goddard Space Flight Center

"Your provision of innovative and cost-effective solutions represents exceptional performance in the area of knowledge capture, access and use over a significant period of time."

U.S. Geological Survey

"...your team can sense the future environment, both policy and technical, and mobilize to provide new insights in the ways we approach our goals and our products and services."
